EXAMINER'S AMENDMENT

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 11-52, drawn to a vaccine, classified in class 424, subclass 93.1.
 - II. Claims 53-64, drawn to a method of delivering a therapeutic agent, classified in class 435, subclass 252.1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to methods and compositions which are not capable of use together and have different effects. For example, the vaccines and methods of Group I use antigenic agents and have the effect of eliciting an immune response, whereas the methods of Group II utilize therapeutic agents and have the effect of providing a therapeutic response.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1635

4. During a telephone conversation with Richard Osman on 04-09-01 a provisional election was made without traverse to prosecute the invention of Group I, claims 11-52.

Claims 53-64 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

6. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Richard Osman on 04-09-01.

Art Unit: 1635

7. The application has been amended as follows:

Claims 53-64 have been canceled.

Claim 40 has been amended to read:

40. (Twice amended) A method of introducing a foreign antigenic agent into a eukaryotic cell comprising the step of contacting the cell with [the bacterium of claim 11] a non-virulent bacterium comprising a first gene encoding a nonsecreted foreign functional cytolysin operably linked to a heterologous promoter which expresses the cytolysin in the bacterium, and a second gene encoding the foreign antigenic agent under conditions whereby the agent enters the cell.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior rejections of record have been withdrawn in view of Applicant's arguments and amendments. The art search and of record does not teach or fairly suggest the vaccine compositions or methods claimed. Further, the Terminal Disclaimer filed on 10-31-00 obviates any rejection based on Double Patenting.

Art Unit: 1635

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
